

ProfitSword Automated Income Journal

Connected systems, consistent view

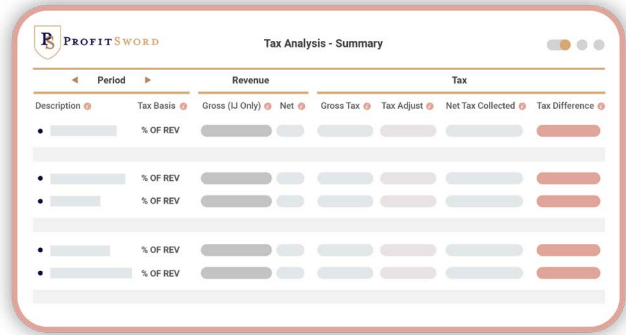

ProfitSword's Automated Income Journal allows financial teams to do more with less by connecting all of your systems to get a consolidated view of financial performance and eliminate hours of work.

With ProfitSword, your teams can:

- complete revenue reporting across departments more accurately and efficiently,
- filter views to find important information,
- complete credit card and tax-exempt reconciliations,
- have a better understanding of the current cash status
- easily recall if corrections need to be made.

Automated Income Journal takes your imported data and creates an accurate, normalized daily view of financial information that enables automatic posting to accounting systems and improves team communication.

Daily Reporting

Print-ready, exportable standardized reports to track and share financial performance across over 200 integrations with various systems.

Cash Management

Give your teams their own cash accounts to keep track of and report on expenses and daily income across departments.

In-line Comments

Improve accountability across teams by allowing for additional explanations for overages or shortages on all transactions and budgets.
