

# ProfitSword for Properties

## Clarity and accountability, all in one place

Hotel managers and staff struggle to meet corporate expectations while interacting with guests and managing property upkeep. As a result, they are often not confident in the data and reports they provide. In addition, disparate systems across their properties lead to inconsistencies and overall frustration. ProfitSword automates the data gathering process and consolidates your view of team and property performance in real-time to drive efficiency and enhance the guest experience.

**ProfitSword provides business intelligence software for hotels to decrease manual work by connecting the systems across the property into one platform, enabling fast and intelligent data-driven decision-making.**

### Automated Reporting

Efficiently create standardized, print-ready, and exportable reports on any data point from across your systems to free up staff and management time, enhancing the guest experience.

### Revenue & Checkbook Tracking

Aggregate department spending and improve team communications with an accurate, normalized daily view of financial information with automatic posting to accounting systems.

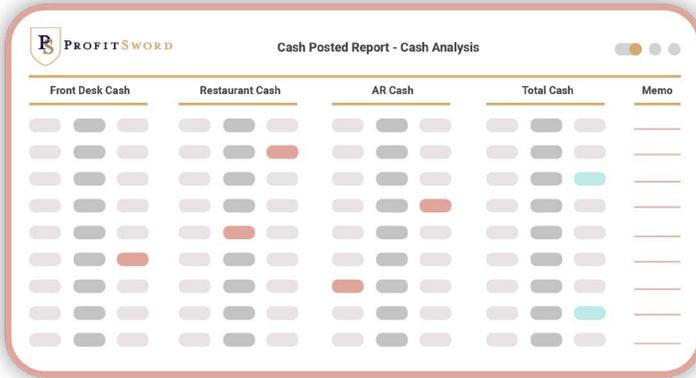

### Variance Commentary Reports

Allows teams to comment on variances between performance and budget, then quickly access a database of reports for financial, sales, strategies, and goals to make tracking the "why" easy.

# Consolidate Systems Across the Property

Integrate data points from across your systems, allowing teams to complete analysis by data set, drill down into the details, and provide visibility across properties and departments.

## Real-time Data and Informative Dashboards

Access and assess data from various systems to make proactive operational and budgetary decisions to increase employee and guest satisfaction and maximize the profitability of your property.
